Presentation
1,8oz tube

Applications

- **Description**
Anti-aging, skin perfecting color cream.
- **Effect**
It harmonizes skin tone, reduces wrinkles and improves skin elasticity.
- **Properties**
It protects and corrects the signs of fatigue and expression lines and has an anti-oxidant effect which combats skin aging.
Protects cell pigmentation from UV radiation by reflecting light away from the skin.

- **Key components**
Interference pigments: Interference pigments are deposited in the skin's crevices; visually reducing the appearance of wrinkles in a very short time.
Micro-dispersed pigments: provide color and brightness and visibly reduce imperfections and signs of fatigue.
Pelvetia canaliculata extract (Ambré Oceane): Algae extract which provides protection against the action of free radicals, re-densifying effect on the dermis which results in a clear reduction of wrinkles, in number, length and in depth.
Artemia plankton extract: Providing the energy needed for proper cell metabolism.
Glycine soya (soybean) seed extract: Derived from soy, rich in proteins, glycol-proteins and polysaccharides. Its action on the skin is unique because it acts as a cell bio-filter, while activating the skin renewal processes.
Ceramides: Responsible for the corneocyte bonds which maintain a barrier effect protecting the skin from dehydration.
Betaine: Extracted from cane sugar trimethylglycine has natural film forming and moisturizing properties.

- **How to use**
Smooth over perfectly cleansed face, neck and décolletage with a gentle massage until completely absorbed.

- **Sales arguments**
 - Diminishes the appearance of wrinkles
 - Illuminates and reduces imperfections
 - Anti-oxidant properties to combat skin aging
 - Protection from environmental agents and the sun (SPF 15)
 - Deep-down skin hydration.
